## Profile

I'm currently interested in programming and decided it is something I want to do and learn more. After learning few things on the internet, I fortunately given chance to learnt freely Android development by dicoding. However now I'm interested in front-end development.

## Education

May 2011 – May 2014  
SMKN 3 Kuningan Vocational High School, Kuningan, st Java,

## Course

May 2022 – July 2022  
Android Fundamental Course by dicoding

Learn fundamental Kotlin and Android development such as ui/ux how to put layout in Android Studio, how to display data from api. Implementing crud with open api from github. And learnt a bit about mySqlite in Android.

Currently I'm learning how to build website using React Js, Next Js, also fundamental of HTML, CSS, JavaScript, and use Jwt, CRUD API,

## Organization Experience

August 2011 – April 2012  
Pencak Silat Tapak Suci Muhammdiyah SMKN 3 Kuningan.

I was a member of one of Indonesia traditional martial arts which is called Tapak Suci when I was in school for a year.

# Portofolio

A Website I built together with my collagues you can choose and pick products here you can register,login,

Add products to card and create new product.
